

JUDa BUILDERS Ditch Bank Rig

The **Ditchbank Rig** is the state-of-the-art equipment system that employs an air winch to raise and lower a hydraulic single roller system on any slope. Flood control channels, water retention basins, spillways, banks under freeway overpasses, even concrete roofs. The versatile **Ditchbank Rig** will screed slope panels up to 30 feet across and as steep as 65 degrees. The screed and rigging can be easily adapted to tapers, curves, inside and outside radius

Features:

- Easy move in and move out.
- Can be adapted for "hand pours" underneath structures
- Light weight enough for use with chair systems or wood forms.
- Available with DB neckdown tubes for overhead screeds.
- Moves and grades concrete during the placing process
- Control driver may be run on either end of the tube
- Rigging cables hook directly to the roller tube
- Hydraulic Roller Screed system can be used on flat pours

Options:

- DB rig can be mounted on the following: Flatbed Truck, Towable Utility Trailer, Wheels and Jacks, (not for highway use, must be secured)
- Rollers: Regular 6" OD .135wall roller with welded DB ends for sunken screed, Neckdown roller with DB ends for overhead screed, Rigging support posts for wide pours (over 22')
- A variety of chair systems are available depending on job specifications.

Specifications:

- 6", 0.135 wall DB roller 8' to 30' lengths with welded ends
- 2000lb. Capacity Ingersoll Rand Air winch
- Hydraulic Power Unit 5gpm, 2500psi
- 100' twin line hydraulic hose for Control Driver
- All welded steel construction on rig
- Easily adjust rig for tubes from 10' to 30'
- All necessary hardware included

Ditch Bank Rig

Repairing California Aqueduct with truck mounted Ditch Bank Rig

Whether the scope of your project is to build a small spillway or to pave the California Aqueduct, the **Ditchbank Rig** and **Roller Screed** will make the job easier, safer, and faster. ***That all adds up to a savings of time, material, finishers, and laborers!***

The Ditch Bank Rig mounted on a towable utility trailer, screeding a spillway

Better production and quality are just two of the advantages to using our **DITCHBANK RIG** and **ROLLER SCREED** on slope paving projects. The versatile rig may be mounted on a truck bed, trailer, wheels and jacks, and it can be configured to handle almost any slope situation.
